

Abbotsley Village Hall

9th July 2019

Tayberry Construction Ltd

In June 2019, Abbotsley Village Hall committee had some major building works carried out by Tayberry Construction Ltd and this work was all carried out to a very high standard, with excellent forward planning and timely availability of all the required labour, plant and materials.

The work involved carrying out significant excavations, groundworks and building new retaining walls at the rear South West of the village hall and then the demolition and subsequent rebuild of a brick built lean-to store, to the rear of the hall, that had deteriorated to the point where rebuilding it was the only viable option.

The work area and village hall internal facilities were kept clean and tidy throughout the works, despite some very poor weather conditions early on and the work areas were all well demarcated from accessible areas, by appropriate use of fencing and taped barriers.

Abbotsley Village Hall committee would have no hesitation in strongly recommending Tayberry Construction to any other individuals or organisations who are considering carrying out any type of building works in the future.
